

Julia Kasanzewa

iOS & Backend Developer

Berlin, Germany · kasanzewa.julia@gmail.com

+49 176 2176 3296 · juliaknzw.github.io

github.com/juliaknzw · linkedin.com/in/julia-kasanzewa

Software engineer with **5+ years of experience in backend and iOS development**, specialising in scalable system architecture, API design, and on-device machine learning. B.Sc. Computer Science and M.Eng. Print & Media Technology (BHT Berlin) give me a cross-disciplinary edge: production backend work, native Swift/SwiftUI features, and a Bachelor's thesis shipping a CoreML/Vision iOS app at 80%+ real-world accuracy. Comfortable owning ambiguity, documenting decisions, and moving fast in small teams. German native, English fluent.

SKILLS

iOS & ML — Swift, SwiftUI, UIKit, CoreML, CreateML, Vision, MVVM / Clean Swift, Xcode

Cloud & CI/CD — Docker, Jenkins, AWS S3, Git (GitHub/ GitLab), Rancher, Kibana

Frontend — Next.js, Vue.js, TypeScript, HTML/CSS

Backend — Node.js, Express, PostgreSQL, MySQL, MongoDB, Sequelize, REST/OpenAPI, Microservices

Testing — Mocha, Chai, k6, JUnit, Selenium, BrowserStack, OpenAPI/Swagger

Process — Agile/Scrum (Scrum Master), Clean Architecture, DDD, Code Review

Soft Skills — ownership, clear technical docs, cross-functional collaboration, mentoring, comfort with ambiguity

EXPERIENCE

iOS & Backend Developer

12/2020 – 01/2025

Nanocosmos GmbH — Interactive Streaming Platform, Remote

- Built and maintained scalable backend services (Node.js, Express, PostgreSQL, Sequelize) for a high-performance interactive streaming platform in a microservices environment
- Designed REST APIs documented in OpenAPI/Swagger; refactored legacy Sequelize queries for performance and maintainability
- Contributed native iOS features in Swift and Objective-C; integrated internal SDKs and debugged UI components in Xcode
- Extended CI/CD pipelines (Docker, Jenkins, AWS S3); monitored production via Kibana; tested with Mocha, Chai, k6, Selenium, BrowserStack

IT & Marketing Strategist

09/2026 – 11/2026

Rad-Börse, Remote

- Planned and delivered a complete WordPress + Hetzner website end-to-end, from discovery call to live launch
- Implemented technical SEO, GDPR compliance, and Core Web Vitals performance optimisation; set up GA4 and Search Console

Founder & Lead Strategist

01/2026 – Present

juliakas.de, D2C wellness brand

- Founded and operate a D2C e-commerce brand solo: WooCommerce store, ManyChat/HubSpot automation, and a SwiftUI + Supabase companion iOS app (see Projects)

PROJECTS

Subconscious Studio

github.com/juliaknzw/subconscious-studio

SwiftUI + Supabase iOS app for my own wellness brand: Sign in with Apple auth, backend data layer, in-progress audio player. In active development.

AI Artwork Guide

github.com/juliaknzw/ai-artwork-guide-ios

Bachelor's thesis: on-device iOS app (Swift, SwiftUI, CoreML, Vision, MVVM) identifying artworks in real time, offline. 80%+ real-world accuracy across 19 classes.

Online Shop Backend

university project

CRUD e-commerce backend (Node.js, Express, MySQL, Sequelize, MVC) powering an EJS storefront. Backend developer and Scrum Master for a 5-person team.

EDUCATION

M.Eng. Print & Media Technology

BHT Berlin

2022 – 2025

B.Sc. Computer Science

BHT Berlin

2017 – 2022

Erasmus+ Exchange, Computer Science

ISEP Porto

2019

EXIST Women Founder Program

Scholarship recipient, startup accelerator

2025 – 2026
